MODULAR SOLUTIONS

In these uncertain times of the COVID-19 crisis, we want to help. We're qualified to provide configurable solutions at scale with rapid installation services. We can produce custom-made solutions that we can quickly configure and assemble into entire temporary clinics, waiting areas and more. We are specialized in off-site construction (no medical equipments delivered).

These custom-made to local needs solutions will be offered at minimal cost price with no commercial margins of course. Available worldwide.

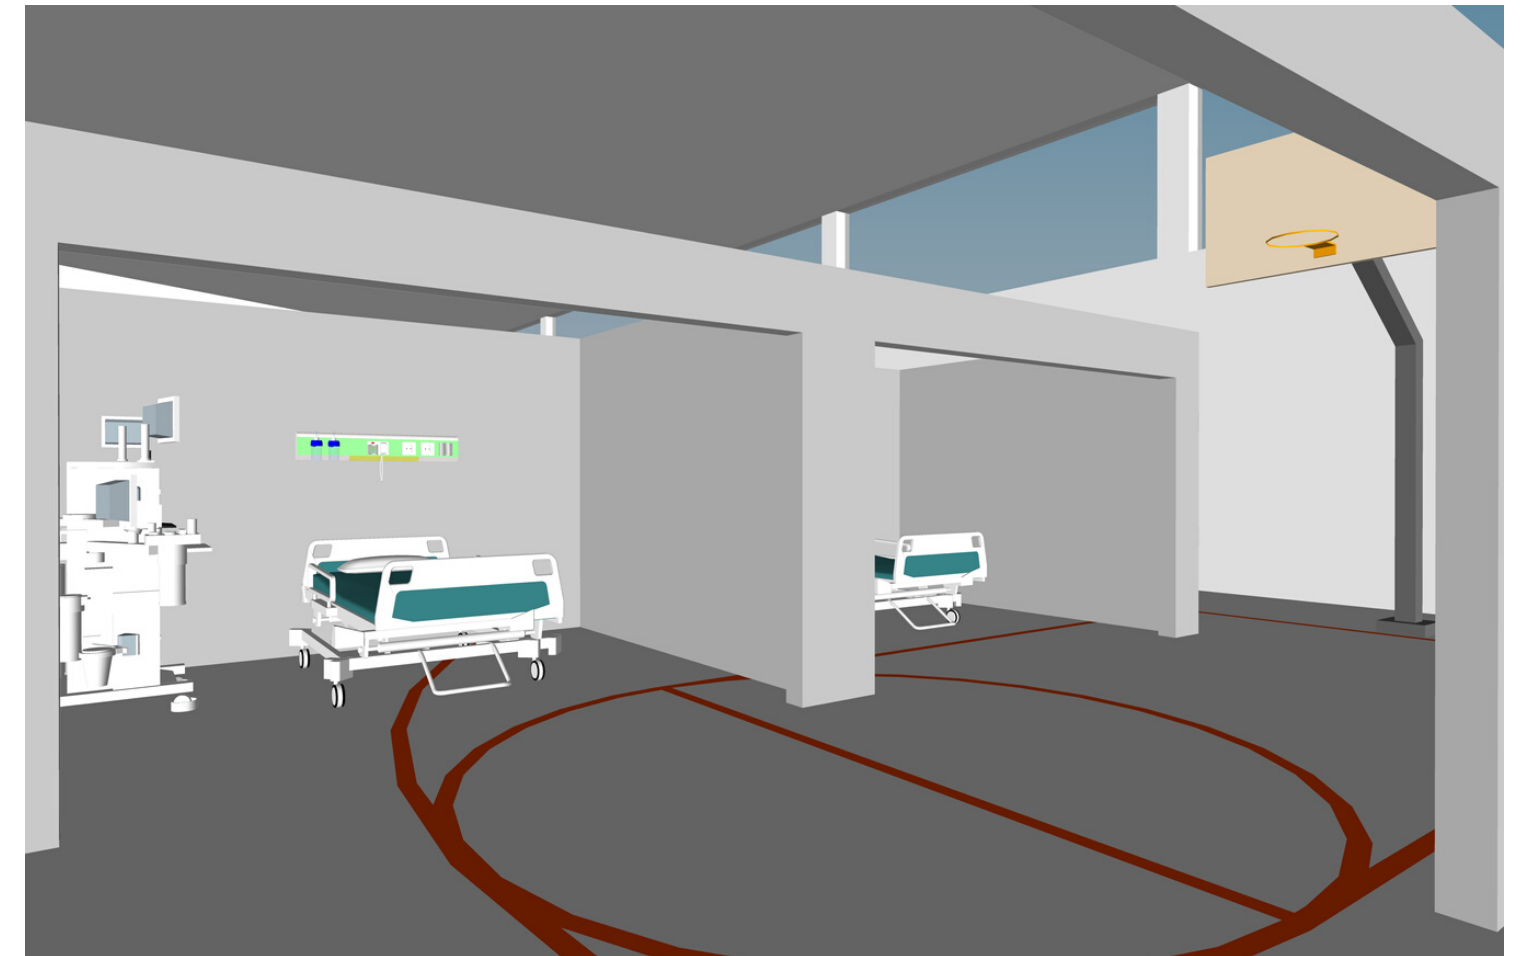

PARTITION SYSTEMS AND WALLS

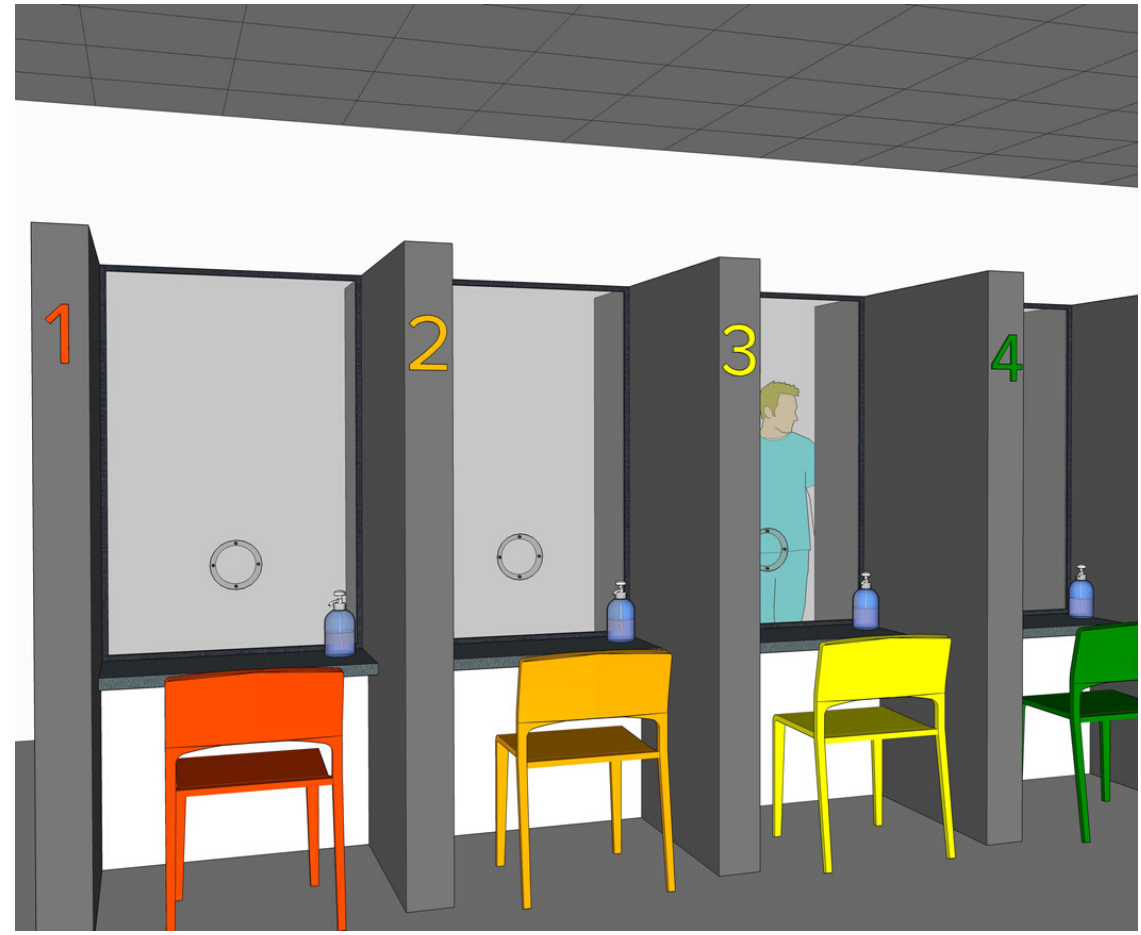

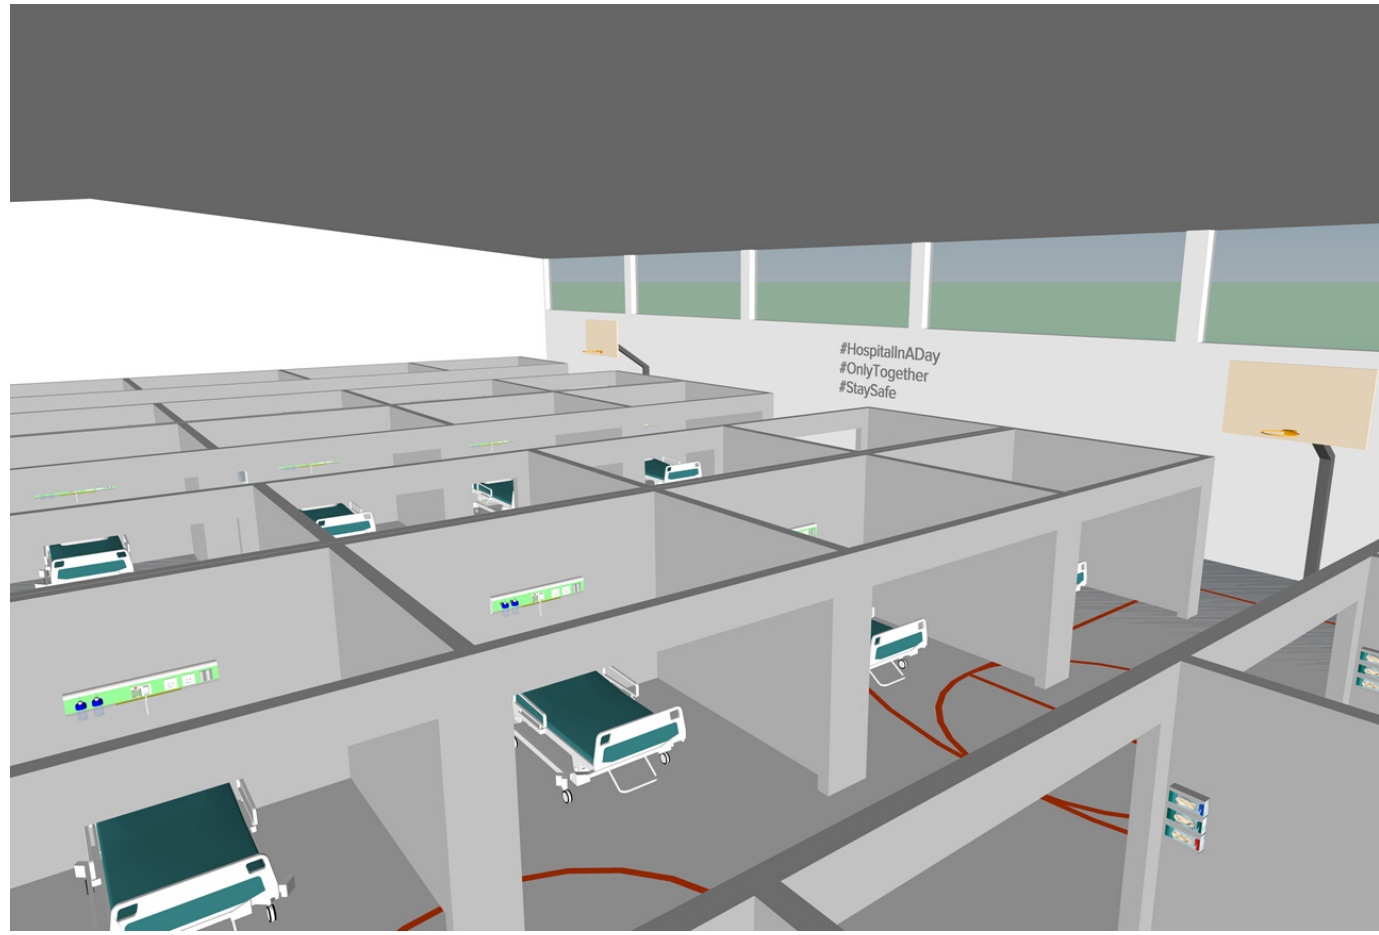

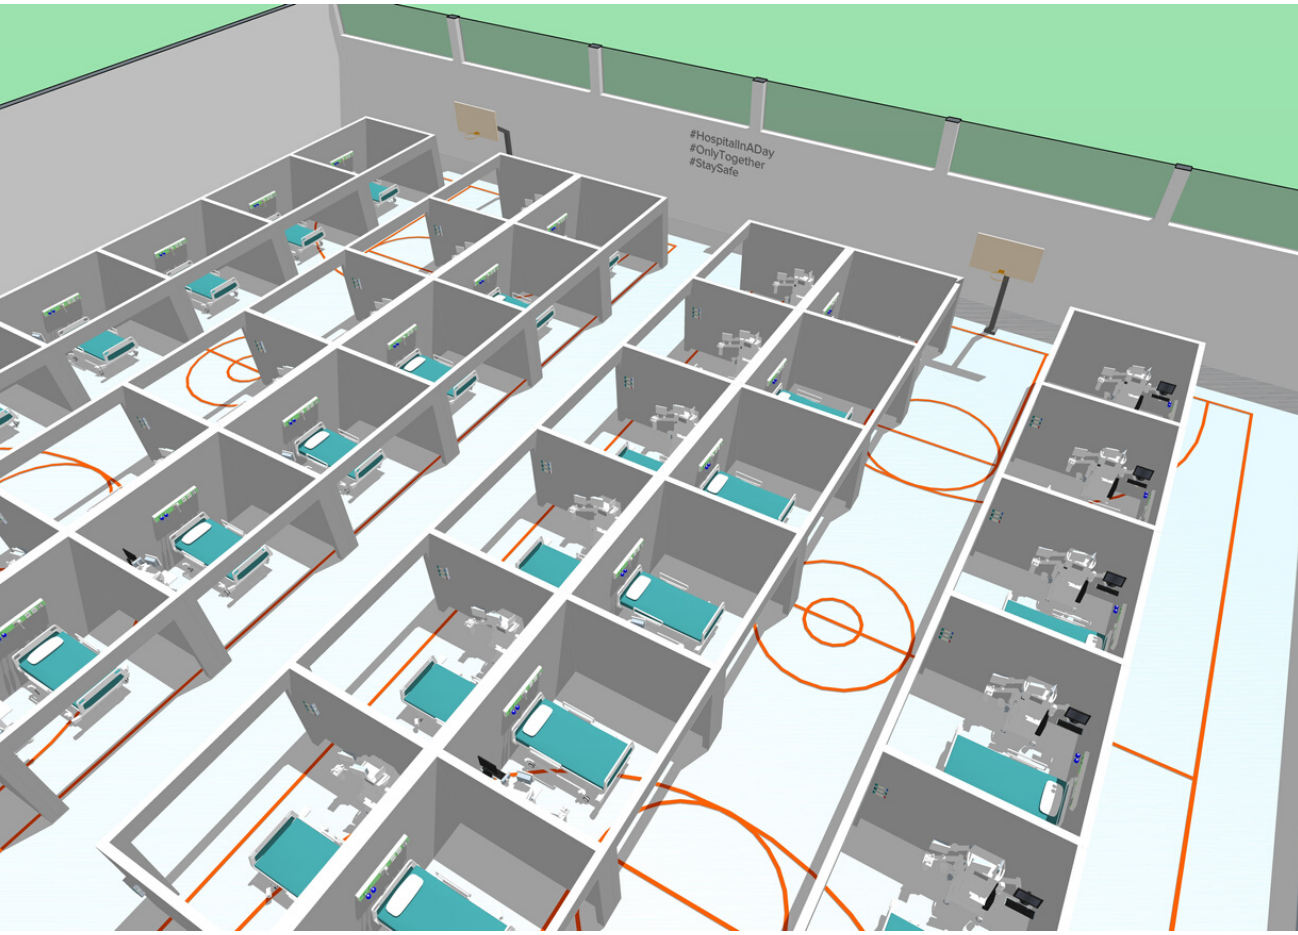

- Safe, effective screening areas for patients
- Separated waiting areas for patients
- Partitioning system will be installed in existing covered areas (eg. sport and event halls).

3D MODULES - TEMPORARY CLINICS

- Care and control units using modular solutions, installed in a few hours on a concrete slab or field
- Temporary 2D or 3D solutions
